

ETEQ Industrial

Mining and Industrial Tyre Handling

When safety, time, and value for money is your priority.

A variety of clamps specifically designed for handling tyres.

When moving tyres with efficiency and accuracy matters.

ETEQ offers a broad selection of Tyre Clamps for palletless applications. The result is faster and more precise handling, resulting in improved productivity, less damage and customers satisfaction.

Double Function Clamps

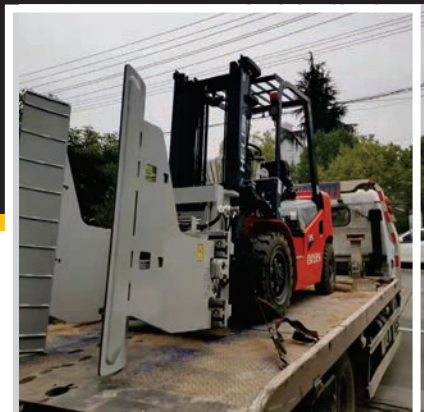

The design can both handle palletized and forked goods.

Extender Tyre Clamps

Designed to be used when loading & unloading tires.

Requires three steps: clamp and rotate, extending when the forklift cannot reach the position.

Non-Rotating Tyre Clamps

For applications that occasionally require the just moving of tires. Neither rotation nor telescoping is required.

Tyre Grippers

With the dedicated arm, it can clamp and rotate the tyres conveniently while warehouse stacking, loading/unloading from trucks.

Slip on Fork Tyre Clamps

Quick and accurate tyre handling can be easily achieved without changing the original clamps.
